KKG is successful at identifying people that need to be brought in and connecting people and resources.

Struck by the history and strength of the network and how it has grown overtime. It is impressive.

KKG Leadership overtime has helped to advance and foster culture of KKG. What this group produces is disseminated widely and free-of-cost.

Resources that partners bring to the table - leveraging existing resources and utilizing network members to build on those resources for Pennsylvania.

Backbone structure of KKG has been key for long-term success.

2

A lot of the history was new for recent members. It was very useful to understand the rich history of the group.

Connection building upon resources, from classroom resources to parent engagement resources.

Long-term sustainability of group is impressive in Pennsylvania, but also for external funders, like CDC.

3. What are the key components of the work that KKG should be doing? (mission). Consider things that should be kept, added, or omitted.

Omitted:

Kept: Connecting people and resources; maintain flexibility to adapt and adjust to what is needed; backbone support; key stakeholders at the table who can leverage funding;

of the community to highlight interest and needs; continue to advance equity - it is a continuous process; continue identifying opportunities for intersection with other health topic areas and social determinants of

Added: Formal Mission and Vision Statement; space for voices of the community to highlight interest and needs; grow intersection of NPA and oral health, etc.

Added: Social determinants of health - trauma informed care/mental health

4. If KKG is successful in its work, what future would you expect to see for children in PA2? (vision)

Equitable access to quality early childhood education

Happier, healthier more active kids

Every child can live healthy no matter their race, location, education or income level.

Increase joy (celebrate our bodies + yummy foods + health!)

Increase overall child wellness

Reducing risk of childhood obesity
