

1. **Resources** **Connections between and with projects and programs** **Number of partnerships** **Energy and commitment of group members - evolution of coalition roles and group work** d out to you as key coalition roles or accomplishments.

2. **History, origins, and evolution of KKG, pre-service for professionals,** **That we could still access some of the kits** you weren't previously aware of?

3. What are the key components of the work that KKG should be doing? (Consider this in terms of no written plan)

Need for strategic planning

Commitment to pre-service materials and programs

Continue to evolve - programs, resources, membership

Share and build awareness of health crisis, issues & resources, healthy equity, whole health focus

Results - how and what we share back with communities, group, and public

Be responsive to organic needs, be careful of funding requirements and how it might pull us from vision and mission

Share more testimonials and personalized results

Utilize partners - connections, resources, programs

How do we create safe zones and communities to promote health?

health is integrated into all programs and funded so that it's not an add on for already burdened providers

4. If KKG is successful in its work, what future would you expect to see for children in PA? (vision)

Safe and healthy

Farm to table

Increased access to healthy choices

Normalizing healthy programs, sustainability, funding
